☒ Examiner's Statement of Reasons for Allowance

Art Unit: 3752

1. The IDS filed June 1, 1998 is hereby acknowledged and has been placed of record. Please find attached a signed and initialed copy of the PTO-1449.
2. The examiner has made the following informal changes to the application to place it in condition for allowance. On page 4, line 26 of text, the reference number 15 was used for the nozzle and then later it was used for the central core. Therefore at this location, the number was changed to 18 since such number had not previously been used anywhere. Please see a corresponding approved drawing correction that makes the same change to figure 1.
3. Claims 1-20 are allowed.
4. The following is an examiner's statement of reasons for allowance: These claims are found to be allowable because the prior art does not provide a thermoplastic hose which meets the necessary combination of a minimum bend radius no greater than 38 mm and a burst pressure of at least 8000 psi. In fact, to the contrary Gray et al. 4,380,252 and 4,447,378 meet the burst pressure but the bend radius is 127 mm. Also, Britain 809,307 has a bend radius of only 19 mm but is silent as to the burst pressure. Germany 2,429,680 merely says that it combines good flexibility with good resistance to high temperatures and high pressures. Schneider et al. And Berfield merely show high pressure washers which utilize hoses to connect between a pump source and a spray wand.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
